Prorated fees may help ensure fairness for members who join late in the year, as they are currently asked to renew again at the end of February (earlybird rate)

The Actual Revenue column is based on our current policy of \$185 for new members from April to September and partial year discount of \$135 for new members from October to January 15th. After January 15th, they are approved to begin their membership on April 1st.

MembershipWorks is the program we use for membership and payments. It is easier to enter a set discount monthly and quote it on the application than to add discount codes.

Discount codes may be used for example: Earlybird, Earlybirdretired, Calgaryfirstyear are all active discount codes that are on all year long. Lethbrighelhalfyear discount code is activated on Oct. 15th and removed on Jan 15th.

When a new member joins, it can cost them up to \$355 to initially join. \$185 for provincial membership, \$25 application fee, plus branch membership fees *up to* \$65, and around \$80 to get a Vulnerable Sector Check if they don't already have one.
